

CERTIFICATE OF ANALYSIS

Purified AAV2-CMV-Luciferase (Lot 19-440)

(for research use only)

Storage Conditions

The AAV vectors should be stored at -80°C for long term usage. When storing for frequent use, 4°C is recommended. Avoid storing at -20°C.

Shelf Life

3 years when stored at -80°C. (AAV)

Shipping Conditions

Dry Ice

Description

AAV2-CMV-Luciferase was produced in insect Sf9 cells by infection with rBV-inCap2-inRepCap-kozak (V104) (Fig 2) and rBV-CMV-Luciferase (AVA13) (Fig 3).

The vectors were purified through 2 rounds of CsCl ultracentrifugations. The CsCl was removed through buffer exchange with 2 PD-10 desalting columns. The final AAVs are in 1xPBS+100mM sodium citrate+0.001% pluronic F-68.

The vectors are for research use only, not for any human use.

Package Contents

Lot 19-440: 4 x 1 ml and 10 x 100 uL

QPCR Titer

Lot 19-440: 2E+13 vg/ mL (final diluted)

Quality Control Data

The vectors were sterilized with 0.22 μ m filter. SDS-PAGE and InstantBlue Staining (Expedeon) verified the purity of the vectors (Fig. 1). Real-time PCR determined the titers of the AAV samples.
