

CERTIFICATE OF ANALYSIS

Purified AAV5-CMV-GFP (Lot 18-676D)

(for research use only)

Storage Conditions

The AAV vectors should be stored at -80°C for long term usage. When storing for frequent use, 4°C is recommended. Avoid storing at -20°C.

Shelf Life

3 years when stored at -80°C.

Shipping Conditions

Wet icepacks overnight

Description

AAV5-CMV-GFP was produced in insect Sf9 cells by dual infection with rBV-inCap5-inRep-hr2 (V295) (Fig. 2) and rBV-CMV-GFP (Fig. 3).

The vectors were purified through 2 rounds of CsCl ultracentrifugations. The CsCl was removed through buffer exchange with 2 PD-10 desalting columns. The final AAVs are in 1xPBS+0.001% pluronic F-68 buffer.

The vectors are for research use only, not for any human use.

QPCR Titer

Lot 18-676D: 2E+13 vg/ mL (final diluted)

Quality Control Data

The vectors were sterilized with 0.22 μ m filter. SDS-PAGE and InstantBlue Staining (Expedeon) verified the purity of the vectors (Fig. 1). Real-time PCR analysis determined the titers of the AAV samples.
