

**CERTIFICATE OF ANALYSIS**

VVK10010822 project#2

Purified AAV6-CBA-GFP-stuffer (Lot# :22-053)

(for research use only)

Storage Conditions

The AAV vectors should be stored at -80°C for long-term usage. When storing for frequent use, 4°C is recommended. Avoid storing at -20°C.

Shelf Life

5 years when stored at -80°C.

Shipping Conditions

Dry Ice

Description

AAV6-CBA-GFP-stuffer was produced in insect Sf9 cells by infection with rBV-inCap6-inRepCap-kozak-hr2 (V290) and rBV-CBA-GFP-stuffer (V459).

The vector was purified through 2 rounds of CsCl ultracentrifugations. The CsCl was removed through buffer exchange with 2 PD-10 desalting columns. The AAV is in 1xPBS+0.001% pluronic F-68 buffer.

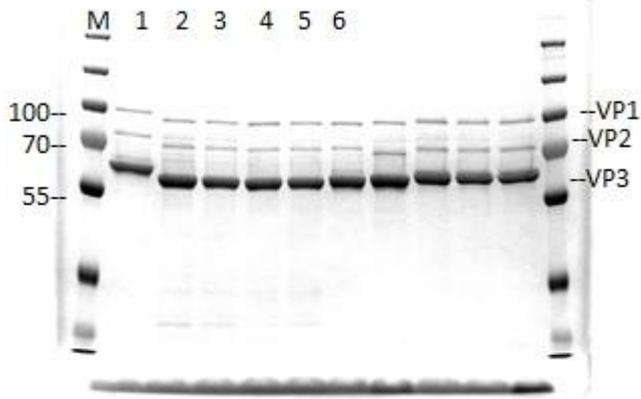

The vectors are for research use only, not for any human use.

QPCR Titer

Lot 22-053: 5E+12 vg/ml (final diluted)

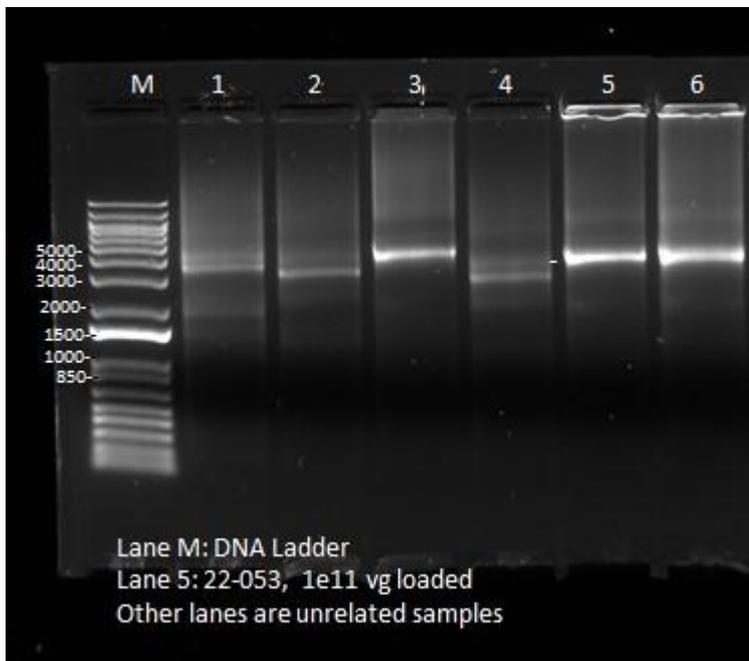

Quality Control Data

The vector was sterilized with 0.22µm filter. SDS-PAGE and InstantBlue Staining (Expedeon) verified the purity of the vectors. See Appendix for SDS-PAGE result. Real-time PCR analysis determined the titers of the full AAV sample.

Lane M: Protein Ladder
Lane 1: AAV8 control, 1e11 vg loaded
Lane 6: 22-053, 1e11 vg loaded
Other lanes are unrelated samples
